BRAKE PARTS

BRAKE CALIPER PISTON KITS

- Stainless steel reduces thermal conductivity by up to 90% (compared to aluminum) increasing brake responsiveness during periods of high braking
- High-grade 304 stainless steel removes the potential for corrosion normally found in chrome-plated pistons
- Compared to composite pistons which become brittle, stainless steel will withstand the test of time
- Eliminates failure-prone ceramic inserts used on some models
- Eliminates the need to purchase expensive OEM caliper pistons or even sometimes a complete caliper
- Average retail price is 55% less expensive than OEM caliper pistons

BRAKE PARTS

CALIPER REBUILD KITS

- Improves brake feel and restores lost brake performance, with a proper brake bleed
- Decreases risk of seized or leaking brake caliper pistons
- Kits for front or rear applications are available
- Gives new life to the caliper by replacing deteriorated rubber parts
- Front street kits include components to rebuild both front calipers where applicable
- Kits for KTM/Husqvarna and new Gas-Gas models include pin retaining clips to provide added security and decrease the chance of pins falling out, causing the loss of brake pads
- Includes as applicable: boots, seals, bleeder cap, brake pad retaining pins and copper washers

BRAKE PAD RETAINING PIN KITS

- Serve as a guide for the brake pads as they meet the rotor and hold the pads in their caliper
- Recommended to replace while replacing the brake pads for optimal braking performance
- Stock pins become corroded and develop grooves after being repeatedly subjected to heat, mud, dust and moisture, causing poor braking performance
- Brake caliper bolts come with pre-applied thread-locking compound for added security
- Kits contain replacement pins and bolts for one caliper
- Retaining clips are included when necessary

A-ARM REBUILD UPGRADE KITS

+ OEM design uses 2 spherical bearings to carry the thrust load of the entire front end; once the bearings begin to wear the external seals become ineffective due to excess play allowing water and debris to enter the assembly
+ Contains all parts needed for all four A-arms
+ 12 machined acetal shoulder bushings and hardened steel pins carry the load greatly extending the life of the A-arm assembly

BRAKE PARTS

BRAKE CALIPER REBUILD KITS

- Improves brake feel and restores lost brake performance, with a proper brake bleed
- Decreases risk of seized or leaking brake caliper pistons
- Kits for front or rear applications are available
- Gives new life to the caliper by replacing deteriorated rubber parts
- Front street kits include components to rebuild both front calipers where applicable
- Kits for KTM/Husqvarna and new Gas-Gas models include pin retaining clips to provide added security and decrease the chance of pins falling out, causing the loss of brake pads
- Includes as applicable: boots, seals, bleeder cap, brake pad retaining pins and copper washers

BRAKE PAD RETAINING PIN KITS

- Serve as a guide for the brake pads as they meet the rotor and hold the pads in their caliper
- Recommended to replace while replacing the brake pads for optimal braking performance
- Stock pins become corroded and develop grooves after being repeatedly subjected to heat, mud, dust and moisture, causing poor braking performance
- Brake caliper bolts come with pre-applied thread-locking compound for added security
- Kits contain replacement pins and bolts for one caliper
- Retaining clips are included when necessary
